AUTONOMOUS
POWER LINE
INSPECTIONS

26-08-2020
DRONE MØTET
NÆRINGSFORENINGEN

Greener

- Emission free (in air)
- Noise reduction

Safer

- Dramatically lowers risk for:
- Inspection personnel
 - Third party and civilians
 - Farm animals and wildlife

More efficient

- A more data driven approach with better insights
- Real time monitoring of the health of the power grid
- Remote and autonomous data collection from anywhere in the world

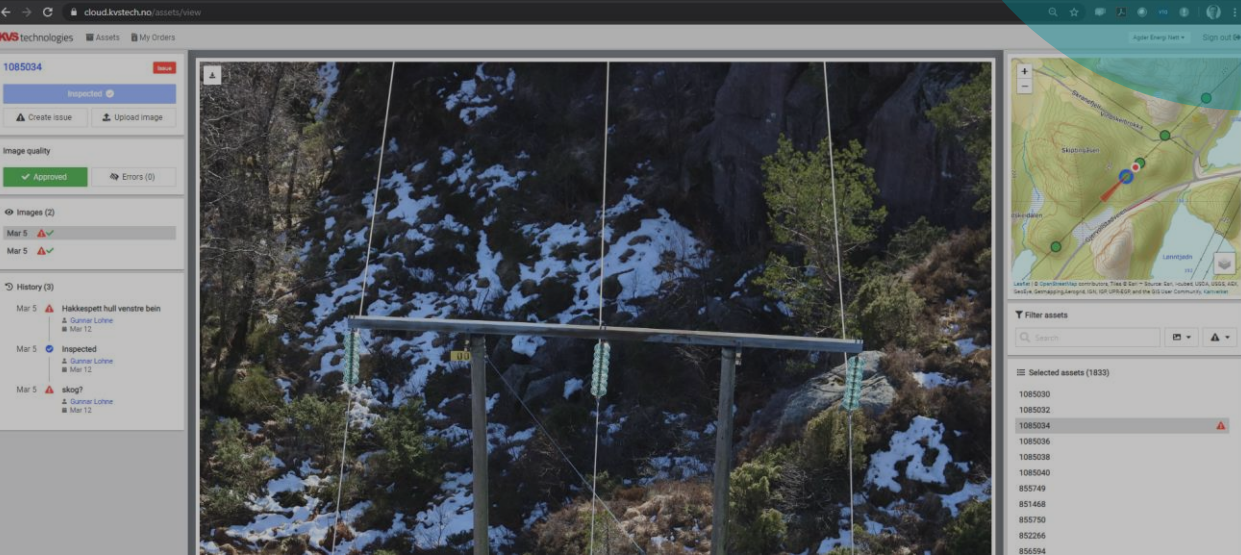

A global issue

Global
Service delivery

Technology

Takk for oppmerksomheten!
